Activated / Updated	2024-04-26 / 2024-04-26
Job Type	IT (PC, Web, Unix) - Business Application SE IT (PC, Web, Unix) - Web Application SE IT (Hardware/Network) - Cloud Engineer
Industry	System Integrator
Location	Asia Japan Tokyo
Job Description	You will be entrusted with IT development for logistics, financial, medical, civil, and manufacturing companies that rely on us for their business process development needs. You will be assigned to a project based on your strengths and aspirations. You can challenge any project to grow your professional career. Operational System Engineers play a vital role in our company. We specialize in system development, infrastructure architecture, and Microsoft Azure-based cloud migration and sales. Our services span various technologies, including Python, C#.NET, Java, PowerBuilder for logistics, and PowerShell for OS-level development. At Global Aspirations, we promote an engineer-first company culture and pride ourselves on our high employee retention rate. We provide an environment where you can enhance your skills, grow your career, and make a lasting impact. Join us and be a part of the development of business systems for a wide range of industries. Here are a few examples of industry-focused projects: ・Web application development for blockchain, virtual currencies, and FX. ・Application development for medical devices. ・Application development for commercial scanners. ・Development of logistics warehouse system ・Application development for large-scale DX business using Azure. ・Quick web application creation using low-code development platforms.
Company Info	Established in 2013, Global Aspirations Company Limited has built a solid track record of success among venture companies. We are fueling our organizational growth by highly valuing the voice of our employees. We strive to create an environment that fosters personal growth and comfort. 【Work-life balance】 We offer flexible work-from-home options, allowing our employees to choose which days to work remotely each week. We believe in communication and transparency and encourage open communication through company-wide meetings held once a month in the office, where we discuss the direction of the company and other matters. The teams conduct regular meetings, and group discussions in the office. A supportive environment where employees can have open discussions has helped us maintain our high staff retention rate. 【Career growth support】 We make it a priority to consider your skills, career aspirations, and values when assigning an employee to a project. We offer an empowering environment to expand your potential. We focus on Azure and SQL Server applications and conduct free monthly learning sessions for everyone. As an engineer, you will get the opportunity to rise to new heights and also act as a mentor or a tutor. In addition, there are special academic sessions for second and third-year professionals, focusing on diverse topics such as data science, AI, BI, autonomous driving, non-programming products, and SQL Server 2022. With plenty of ongoing learning opportunities, you can stay ahead of the curve and expand your skills.

	【Team dynamics】 We have about 25 dedicated employees on our team with an average age of 34. Our diverse team includes about 30% foreign nationals of different cultures. Although Japanese is used daily, the company environment is inclusive where everyone can succeed regardless of nationality. 【Measures to prevent passive smoking】 No smoking indoors in principle
