| Job Description | <p>[Job Summary] You will be active as a circuit design engineer in projects for a wide variety of companies and occupations, such as automobiles, home appliances, digital equipment, machine tools, precision machinery, aircraft, semiconductors, robots, and space.</p> <p>[duty details] <ul style="list-style-type: none"> • Wire harness circuit design • Circuit design of automobile lamps • ECU circuit design • Power supply circuit design for home energy systems, etc. </p> <p>The company has a wide range of business areas and can be involved in "manufacturing" from upstream to downstream. We also offer new projects and important positions that are not generally open to the public.</p> <p>[A company that values the thoughts of engineers] The company's recruiting team consists mainly of former engineers. Since I will be speaking with my own experience, I am conducting the selection process in an interview style rather than an interview style. I sometimes consult with them about what I want to do as an engineer. First of all, please feel free to apply and tell us your thoughts at the interview. The company will propose career steps that match your thoughts.</p> |
