| Job Type | IT (PC, Web, Unix) - Web Application SE |
| Industry | |
| Location | Asia Japan Tokyo |
| Job Description | <p>We will ask you to participate in the development team of our own service, the tourism DX platform and the commercial facility DX platform, and leave the new development and update of the service function.</p> <p>Based on the top-class digital map technology and know-how that we have independently built up in Japan, you will be able to experience many of the latest technologies through an integrated platform such as IoT linkage, ticket reservation function, and payment infrastructure construction.</p> <p>Since it is our own service, there are no specifications or development restrictions, and it is a creative job that always listens to the voices of users and comes up with new ideas as a team to create more convenient and easy-to-use products. In addition to programming according to the instructions, we will propose improvements and better algorithms, and we will work as a team to realize them.</p> <p>Due to the rapid increase in the number of projects we receive, we are starting to run out of human resources responsible for development. As we continue to develop new businesses, we believe that we must welcome new people who will play a central role in development.</p> |
| Company Info | <p>Business content Tourism DX related business / Commercial facility DX related business / System and software development business / Business consulting business / Digital marketing business</p> <p>client layer Municipalities nationwide, tourism associations, business companies related to tourism and commercial facilities, advertising agencies</p> <p>Revenue model: SaaS</p> |
