Job Type	IT (Hardware/Network) - Network Engineer
Industry	
Location	Asia Japan Tokyo
Job Description	<Infrastructure design and construction> There are various tasks such as database design and selection, server design and construction within a large framework that is lumped together with infrastructure, so you will be asked to perform tasks that match your individual vision. In addition, in line with the times, we are currently handling many cloud service projects such as AWS. Since we have direct contracts with customers in various fields, we plan to have them take charge of a wide range of tasks, from proposals for improving current operating methods such as information systems and cost reductions, to design and construction. <Examples of work assignments for those who recently joined the company> In migrating the infrastructure of a certain online game, detailed design and everything (results of migrating to AWS) Work to migrate in-house systems from on-premises to AWS Construction of system infrastructure for a project to improve customer service in a certain telecommunications industry <Flow after joining the company> skill check We will check the skills you talked about during the interview and decide which process to start at which site. If necessary, we will conduct intensive technical training in-house for one to two months, so please do not worry. In addition, we will thoroughly discuss the future vision and growth steps that you have discussed during the interview, taking into account your career plan. ↓ Customer interview (There are also projects within Axisware) ↓ team assignment We already have many employees in our company, so we will ask you to join each team and do the work. <About after team assignment> There are many opportunities to return to the company, such as the once-a-month return-to-work day for the division and the team-to-work day, as well as free-for-all skill training. In addition, once every six months, we have a goal setting and review interview with the president, and we place great importance on career growth. recruitment
