Recruiter Company	iHOLON Co.,Ltd
Company Name	Company name is private
Activated / Updated	2024-05-07 / 2024-05-08
Job Type	IT (Hardware/Network) - Cloud Engineer
Industry	
Location	Asia Japan Tokyo
Job Description	Utilizing public clouds such as AWS and Azure, you will be in charge of designing and building from the proposal of the foundation of the customer company. We are promoting the provision of a hybrid cloud environment to our customers, as we also have in-house consignment projects for on-premises environments. After joining the company, we will participate in our own contracted projects for 3 to 6 months and support our employees to improve their technical skills (OJT system is in place). ● Focus points For customer issues, we can propose optimal system improvements, including the use of public clouds such as AWS, Azure, and GCP, and be consistently involved from project launch to expansion. Depending on the status of the proposal, we will respond not only to the cloud, but also to on-premises and hybrid cloud projects. ● Step-up example We have an on-the-job training (OJT) system, and it is possible to acquire skills while learning from experts through projects even in inexperienced fields. From the time you join the company, you can be involved in upstream processes such as proposals and requirements definition. If you wish, you can also be involved in project development and management. ● Project content ① ・Overview: Proposal for cloud migration for a major telecommunications carrier ・ Responsible phase: system planning, proposal (consulting) ・Technical elements: AWS, CentOS, PostgreSQL, Oracle ● Project content ② ・Overview: Migrating from an on-premises server of a certain manufacturing company to AWS ・ Responsible phase: AWS migration proposal, server, network construction design ・Technical elements: AWS (EC2, S3, RDS, Route53, CodePipeline, CloudFormation, ELB), Windows, Linux We are looking for young engineers for 500 and 1000 people.
	Since our founding, we have been highly evaluated by customers such as major companies in application development, infrastructure construction, operation and maintenance. We were able to continue to be in the black for the 19th consecutive term. In recent years, we have been focusing on AI, big data, IoT, and cloud growth fields, and are steadily expanding our business. 1. Web application development using AI data science The businesses that drive digital transformation (cloud/mobility/big data/social technology) "Solid high growth is expected." In particular, we are focusing on development that actively utilizes AI data science. 2. Infrastructure cloud design and construction Looking to the future for the development of corporate infrastructure such as technologies surrounding the cloud (networks, virtualization, security, storage) We aim to be a cloud technology expert and a reliable partner who will support us throughout the years. 3. Software Quality Assurance

Company Info	We provide basic business (SQA by testing and verification) and value-added business (analysis and highly specialized SQA). 4Technical support Mainly "system operation" such as maintenance and operation monitoring of various servers and networks, support desk, help desk, etc. Creation of rules before the start of operation, proposals for improvement of risk management, communication rules, and escalation flow We provide a one-stop service for a series of tasks in "system operation" such as 5.IT consulting By utilizing our know-how in the medical IT field, we can provide the necessary IT operation operations and costs just (at the right time, at the right time). We will calculate and strongly support our customers. Main Products/Services: Infrastructure/Cloud Construction application development technical support IT consulting Earnings model: Shift to IT growth fields Data science, AI field projects increase ■ More than 300 IT engineers enrolled ■Organization by values (management-oriented, technology-oriented, work-life balance-oriented) ■ Emphasis on realization of employees' desired careers
