

## Job Detail

Staff Level

Position Title	[Hyogo] iOS Engineer
Recruiter Company	WORKPORT, inc.
Company Name	Company name is private
Activated / Updated	2024-04-08 / 2024-04-08
Job Type	IT (PC, Web, Unix) - Web Application SE IT (PC, Web, Unix) - Programmer
Industry	
Location	Asia Japan Hyogo
Job Description	<p>[Job summary] As an iOS engineer for a CtoB auction service, you will be involved in all phases necessary for product development, including planning, design, development, and operation. You will be involved in systems used by users and buyers, and management systems used by employees.</p> <p>[Job details] • Development of new functions, design, development, operation and maintenance of functional improvements • Document creation and review of specifications and design documents • Improvements/technical proposals in function development</p> <p>[Characteristics of the position] The company's engineering organization is more product-oriented than tech-oriented, and has many members who are problem-solving and goal-oriented. Rather than focusing on why something can't be done or what hasn't been done, it's important to focus on what to do next. Furthermore, development is just a means to an end, and development is often carried out in close collaboration with business-side teams, creating an environment where you can freely express your opinions in order to grow the service and company.</p>
