Job Detail

Position Title	[Tokyo: Remote] Software development engineer
Recruiter Company	WORKPORT, inc.
Company Name	Company name is private
Activated / Updated	2024-04-08 / 2024-04-08
Job Type	IT (Embedded Software, Control Systems) - Software Architecture IT (PC, Web, Unix) - Programmer
Industry	
Location	Asia Japan Tokyo
Job Description	[Job summary] As a software development engineer at the company, I will be in charge of all processes, including defining requirements and designing embedded secure applications that run on secure chips, while collaborating with external stakeholders, internal business departments, and various systems staff. First, you will gain experience working with existing members, and eventually you will lead the members and promote development as a team leader or project leader. [Job details] ・Requirements definition/development (design, implementation, evaluation)/maintenance (especially upstream processes) ・Technical review/specification adjustment with engineers from other companies ・Technology review/verification for new business [Characteristics and atmosphere of the workplace] ・The team members have a culture of supporting each other's challenges and suggestions, so it's a workplace where it's easy to challenge what you want to do. ・As I work from home a lot, I am constantly communicating using tools to create an open atmosphere (we have online morning meetings every day to communicate). - We are an organization that facilitates communication as we promote projects from a distance that allows us to interact easily with members of other departments. ・We are an organization that actively promotes the use of vacation days and balances work with childcare and nursing care.
