Location	Asia Japan Tokyo
Job Description	We are looking for Multi-Cloud Engineers who will play a key role in Consulting and Solution Design & Architecture for Cloud Professional Services. In this role you will work as a trusted advisor for our enterprise clients, leading all aspects of business development, people management, relationship development, hands-on implementation of cloud solutions and program management. You will also serve as a mentor to our other team members. We are requiring someone bilingual: Must have business level proficiency in both English and Japanese What you will be responsible for: - Collaborate with cross functional teams to identify, design and implement enterprise multicloud and hybrid cloud solutions Azure/AWS/GCP. - Working with key stakeholders (c-level) to define and implement cloud-based migration solutions in line with industry best practices and enterprise architecture guidelines. - Leading a team of cloud consulting experts, architects and engineers from Amdocs and the client side. - Oversee the engagement to ensure architectures are implemented, assuming accountability for on-time, on-budget, on-quality delivery. - Conducting discovery sessions with clients and presenting cloud solutions at meetups, conferences, and technology events.
Company Info	The Amdocs Cloud Business Unit is leading a high profile number of professional services, system integration and managed services. We help enterprises make the most of cloud services with a focus on security, governance and compliance. We provide professional services for securing, migrating and managing the cloud infrastructure of large enterprise customers. We specialize in configuration management, automation, cloud computing, security and data management for a wide range of industries, including financial services, media, and telecommunications companies. By utilising our proven deployment frameworks, managed services, and trusted design patterns, we work with the largest and most security conscious organisations to unlock innovation through cloud computing. As market leaders in Enterprise Cloud Transformation, we have top tier partner status with major cloud platform providers including AWS, Google and Microsoft Azure. 【Measures against passive smoking】 No smoking indoors allowed
