

## Job Detail

Staff Level

Position Title	Business system development engineer
Recruiter Company	WORKPORT, inc.
Company Name	Company name is private
Activated / Updated	2024-05-30 / 2024-06-10
Job Type	IT (PC, Web, Unix) - Web Application SE
Industry	
Location	Asia Japan Tokyo
Job Description	<p>[Job summary] You will be responsible for the development of business systems.</p> <p>We can introduce projects from requirements definition to testing process, so you can participate in projects that match your skills and take on the challenge of upstream processes. You will be assigned to the desired project based on your skills and career plan. The proportion of remote projects is also increasing. Please also inquire about your work location.</p> <p>[Characteristics of project participation] Basically, you will be participating as a team. Before selecting a project, we agree on the technical field and participation system conditions, and participate while looking to the next career path and acquiring qualifications and gaining experience. We also rotate internal teams, so you can interact with other engineers and consult with seniors about your career.</p> <p>■Selectable SES We decide on projects while formulating strategies with sales and engineers. In addition to taking on projects that match our skills, we can also take on challenges in upstream processes by forming a team structure. Our sales professionals, who are commercial distribution professionals, also follow up on your career plans, allowing you to build a "valuable work history."</p>
Company Info	Those who are dissatisfied with their current SES! Let's move forward together with a different strategy!
