Job Description	You will be in charge of upstream process work in Native Camp's system development. ◇Cooperation with management staff ◇Requirements definition ◇Basic design ◇Detailed design
Company Info	Native Camp is one of the fastest growing online English conversation companies in Asia. We provide English conversation lessons online at affordable prices as a service for individuals, corporations, and educational institutions. With offices around the world, we operate online English conversation service businesses in Asia, Europe, and North America, and the scale of our business continues to expand rapidly. [Business details] NativeCamp.Edtech, Inc. is a company that serves as the system operation and technology development division of NativeCamp. *Native Camp is an online English conversation platform originating from Japan that represents Asia, and aims to become a language exchange platform that supports various languages in the future. In order to expand the Native Camp platform to the world, we have established a new development company to challenge the world from Miyazaki. The future will become more borderless and there will be more interaction with people from all over the world. In order to communicate with people around the world, English has become a necessary communication skill in addition to your native language. However, learning a new language requires a lot of effort and time. By making full use of technology, we reduce the financial burden on users and allow anyone to enjoy learning English anywhere and at any time. We also want to convey to society the joy of connecting with people around the world. [Purpose of doing business] <Vision> A world where you can communicate with people all over the world. Connecting the world with messages from Miyazaki. <Mission> Developing a language exchange platform used by people around the world.
