Company Info	<p>[Company characteristics] Our company is a technology company that develops high-precision VR content and AI that analyzes user behavior in VR space, and provides a VR platform. Our company believes that "technology has value only when it is used by the people who need it," and our vision is to support people's growth with VR. We continue to take on the challenge of delivering VR, which is more than just entertainment, to solving problems in the world, to as many people as possible. VR is rapidly expanding its use not only in entertainment fields such as games and movies, but also in business applications and education fields, as the need for online education increases due to the new coronavirus and 360° video due to the full-scale introduction of 5G. Real-time distribution of videos is attracting more and more attention.</p> <p>In this growing market, although we are a startup, we provide a one-stop service from the production of high-precision, TV-quality live-action VR content to application development. While supporting interactive functions and behavior analysis using proprietary AI, we have built simple operations that anyone can operate intuitively, and are developing VR solutions that meet the needs of the medical, nursing, and welfare fields. I am.</p>
