Job Detail

Position Title	[Tokyo: Remote] Front-end engineer ◆ An IT company that uses the power of technology to solve problems brought about by technological innovation ◆
Recruiter Company	WORKPORT, inc.
Company Name	Company name is private
Activated / Updated	2024-05-16 / 2024-05-16
Job Type	IT (PC, Web, Unix) - Front-End Engineer
Industry	
Location	Asia Japan Tokyo
Job Description	[Job summary] As our business has expanded, we have continually improved our customer experience, but at the same time, we have continued to accumulate debt. Looking ahead to continued business expansion in the future, there is a need to incorporate the latest technology stacks and shift to a state of higher productivity. However, in order to achieve this, there is a shortage of not only member-class engineers but also leaders who can make decisions, build consensus, and appropriately incorporate the latest technology. It is difficult for the company to accomplish what it wants to do with the number of personnel. As the product continues to grow, we are facing challenges, and we would like to work with you to resolve these issues and move our business forward! [Job details] ・Architectural renewal of existing products ・Product growth ・Collaborate with back-end engineers as a team to promote re-architecture *Since we collaborate with back-end engineers as a product-specific development team, rather than a front-end specialized team, you can be involved in back-end implementation depending on your skills and aspirations. [What kind of people does the team have?] Some members have back-end knowledge and design knowledge, and the team has knowledge not only of the front-end but also of peripheral areas.
