Position Title	[Tokyo] Server Engineer Listed on TSE Standard ◆ Educational support using ICT
Recruiter Company	WORKPORT, inc.
Company Name	Company name is private
Activated / Updated	2024-05-30 / 2024-06-10
Job Type	IT (Hardware/Network) - Server Architect and Developer IT (Hardware/Network) - Server and Machine Operation and Maintenance
Industry	
Location	Asia Japan Tokyo
Job Description	<p>[Job summary] At the company, which develops systems for educational institutions and expands them domestically and internationally, you will be responsible for system design and document creation when introducing or updating in-house products, environment construction and installation work, and operation and maintenance after installation. .</p> <p>We will design and build the system while customizing it depending on the installation location. In addition to accompanying sales and sales representatives to schools to provide explanations and work, recently, online work in a cloud environment has also increased.</p> <p>*Due to the location of the school, on-site work is often carried out during long vacations in the summer, winter, and spring when there are no classes, but sudden work on Saturdays, Sundays, or late at night is less likely to occur, and work is mainly done on weekdays. *Visit the site by public transportation or by car</p> <p>[Advantages of changing jobs to the company] <ul style="list-style-type: none"> ■ You can learn various technologies related to system implementation, such as Windows, Linux, virtualization, and authentication infrastructure. ■ We have received many comments that the introduction of the company's products has improved learning effects at schools. It's a job that makes the client happy and gives them direct gratitude. ■ With the curriculum guidelines revised in 2020 and the need for an "ICT environment" in educational settings, you can take on a variety of challenges! </p>
