

Job Detail

Staff Level

Position Title	[Shenzhen] Semiconductor equipment research and development expert
Recruiter Company	Leverages Career China Co., Ltd
Company Name	Company name is private
Activated / Updated	2024-03-06 / 2024-03-07
Job Type	Electronics (Appliance/Semiconductor) - Basic Research and Development Electronics (Appliance/Semiconductor) - Sales Engineer/Service Engineer Electronics (Appliance/Semiconductor) - Production Engineering
Industry	Electronics, Components, and Semiconductor Manufacturing
Location	Asia China Guangdong
Job Description	<p>[Job summary]</p> <ol style="list-style-type: none"> 1. Research and development and technical support for semiconductor equipment (overhead cranes) 2. Design and development of efficient and reliable semiconductor equipment 3. Support for production of semiconductor equipment 4. Providing solutions to technical problems 5. Participation in industry technology exchange and academic research groups
Company Info	<p>【Company introduction】</p> <p>Our company was founded in 2003 and is a high-tech company specializing in the automation field for more than 20 years, integrating research and development, manufacturing, sales, installation, adjustment and after-sales service. As a leader in the smart manufacturing industry, we offer services such as lithium battery downstream line inspection equipment, smart warehouse logistics, smart software systems, semiconductor inspection equipment, and optical storage solutions.</p> <p>The company has three manufacturing bases in Shenzhen/Guangming, Dongguan/Tangxia, and Dongguan/Huangjiang with an area of approximately 150,000 square meters, and currently has more than 2,000 employees, including more than 800 in the R&D team. In addition, we have a management team from Huawei, Zhongxing, and Dajiang, graduates from top universities, and three core expert teams in machinery, electronic control, and software to promote high-quality development of the entire company.</p> <p>Currently, the business is spread all over the country, including Ning De Ji, BYD, LG, ZhongChuang Shinhang, Ruipu Lanjun, Honeycom Energy, Evie Lian, Chuneng New Energy, Penghui Energy, and Zhengli New Energy. We have built deep trust and long-term cooperative relationships with major companies such as Shinwanda, Lishin Battery, Huaxing Photoelectric, Ansi Bandai Sei, and K&S. We have also established many regional technical service centers in East China, South China and Northwest China regions to provide customers with 24/7 professional after-sales service.</p>
Qualifications	<p>【Prerequisite】</p> <p>Experience in the semiconductor equipment industry required</p> <ol style="list-style-type: none"> 1. (Regular admission) Graduate school graduate or above, related academic background such as mechanical design/manufacturing and its automation, mechanical engineering, automation, electrical automation, electromechanical integration, etc. 2. More than 10 years of experience in designing and developing non-standard automation equipment, semiconductor equipment development experience (fixed crystal machine, chip pasting machine, packaging, AOI inspection, classification, testing, etc.) 3. Familiar with mechanical design and electrical control principles, proficient in the design and development of non-standard automated individual machines and fully automated production lines, and capable of final confirmation and confirmation. 4. Familiar with the design of non-standard automation equipment and the development control flow of new products, with strong project management skills, and with extensive experience in leading large-scale projects. 5. Familiar with the installation and adjustment of non-standard automation equipment, has strong analysis and processing ability for abnormalities during the assembly process, and has good practical ability 6. Have a broad perspective based on a bird's-eye view, and the ability to

	foresight and predict related industries.
