Company Info	<p>[Introduction of the business department] BU Introduction Automotive Division (Automotive industry) We supply highly reliable products in a timely manner to the automobile industry, which is characterized by strict quality standards that require both light weight and durability. In addition to quickly proposing technologies and products required for automobile safety and reliability, we also realize manufacturing that is environmentally friendly and kind to people and the earth. We support the ever-evolving safety, comfort, and ecology of automobiles, both for one person and for all people around the world.</p> <p>[Message] Slogan "Connectivity" is becoming increasingly important in all fields. In the field of automobiles, dramatic advances such as autonomous driving and electrification are about to take place by electrically connecting various devices and exchanging various information, signals, and energy. Our main product, the "connector," is an electronic component that plays a central role in such connection technology. Evolution continues, with high-speed transmission, high-power transmission, compactness and high density, etc. In addition, our company actively promotes procurement and purchasing activities from a global perspective in collaboration with production bases around the world, and we also procure raw materials, parts, equipment, etc. from outside not only domestically but also from outside. We are collaborating with overseas sister factories and expanding our operations into the Asian region. We are one of the world's leading connection technology manufacturers that has been established in Japan from the beginning and has supported the development of electronic device connections. We are applying for applications from those who would like to utilize the experience and execution skills they have cultivated in their procurement and purchasing activities. We are looking forward to seeing you.</p>
