Staff Level

Position Title	[Remote] Infrastructure Engineer ★IoT x Children's Services★/Full remote welcome nationwide
Recruiter Company	WORKPORT, inc.
Company Name	Company name is private
Activated / Updated	2024-05-02 / 2024-05-02
Job Type	IT (Hardware/Network) - Server Architect and Developer
Industry	
Location	Asia Japan Tokyo
Job Description	■Summary Comprehensive ICT services for childcare facilities have increased the number of functions provided and have been introduced in many childcare facilities, but in order to further expand the field and provide stable products, as an infrastructure engineer, I will continue to improve the infrastructure of our company's products in general. You will be responsible for leading the overall design, construction, and operation. Since there are many services to be provided and multiple measures are being executed in parallel, it is necessary to proceed with service development and operation while coordinating with multiple development teams. We are looking for people who can take on the challenge of running a wide range of infrastructure with a small number of people, such as using web services, smartphone apps, LLM (Large-Scale Language Model), and supporting LGWAN (General Government Network). In an AWS-based environment, you will be responsible for the infrastructure design, construction, and operation of our company's products, including Lookmi, in collaboration with server-side engineers, iOS/Android engineers, product managers, and other members. [Expected role] ・Infrastructure design/construction for new product development and additional development of existing products ・Infrastructure improvements and cost reductions for released products ・Design and construction of a system to improve productivity of development members ・Efforts to respond to failures, standardize recovery processes, and proactively detect failures ・Development of guidelines and reference architecture for cross-sectional view of multiple products by a small number of people
Company Info	No smoking indoors
Working Hours	9:30-18:30
Qualifications	[Required] ・Infrastructure design, construction, and operation experience on AWS ・Experience using container technologies such as ECS and Docker ・Linux usage/operation experience ・Ability to work with multiple stakeholders [Optional] ・Infrastructure design, construction, and operation experience on GCP and Azure ・Infrastructure design, construction, and operation skills in on-premises environment ・Infrastructure design, construction, and operation skills in an LGWAN environment ・Skills for designing, building, and operating monitoring systems ・Experience building and operating infrastructure using Terraform or similar IaC ・Experience developing web services using Ruby on Rails
