(Using Ansible Tower) • Practical work from design and construction to maintenance and operation • Design, construction, and quality improvement activities while communicating with customers, within the team, and within the company • Response to various adjustment matters
Company Info	<p>We are a company that promotes DX innovation for all customers through synergy between the AIZE division, which conducts research and development of AI engines, and the SI division, which has a proven track record in system development.</p> <p>With the mission of "technical capabilities x social implementation capabilities," we deliver AI, cutting-edge technology, system development, and solutions to end users, and have many implementation results.</p> <p>With the help of our SI division, which has maintained stable growth for more than 10 years since our founding, and our AIZE division, which has grown 300% in just a few years, we have achieved significant growth without exposing our business foundation to risk. There are not many companies that can have both the AI department that creates the future and the SI department that supports the present.</p> <p>We have 200 engineers and have built an all-in-one product development system that handles not only front-end and back-end development, but also embedding into devices. We have confidence and a proven track record in our ability to realize customer requests based on our ability to build unique AI models.</p> <p>Additionally, in May 2022, the company was listed on the TSE Growth Market. We plan to continue to grow and become a leader in the industry.</p>
	<p>[Required skills]</p> <ul style="list-style-type: none"> • Ansible development experience <p>[Desirable knowledge/experience]</p> <ul style="list-style-type: none"> • Basic knowledge about networks • Development experience using GitLab (CI/CD integration) • Development experience using docker • OS, M/W installation settings • Knowledge about the devices used (juniper, F5 BIG-IPi2600, CISCO NEXUS9300, and many others) • Ansible Tower • Network operation experience with L2, L3, firewalls, load balancers, etc. <p>Remote work will be the norm, except for verification work. (There is a possibility</p>
