Activated / Updated	2024-04-23 / 2024-04-23
Job Type	IT (Hardware/Network) - Cloud Engineer IT (Hardware/Network) - Server Architect and Developer IT (Hardware/Network) - Communication Infrastructure (Including ISP and Career)
Industry	
Location	Asia Japan Osaka Asia Japan Kyoto
Job Description	【Overview】 IT venture company in Kyoto established in 2000, and has been offering system development, cloud solutions and infrastructure services for over 20 years. They provides managed server services using its own data centers and cloud infrastructure such as AWS and GCP and also has businesses in Malaysia, Thailand and China. Some of the engineers are from outside Japan such as the United States, France, Indonesia and Myanmar and more. If you want to work in the Kansai area such as Kyoto or Osaka as an infrastructure engineer and if you are willing to take on the challenge of new services and technologies, you may fit the culture. Due to an increase in cloud projects, we are looking for engineers with knowledge of AWS services and experience in building and operating them. 【Job】 The work you will be in charge of will mainly be customer proposals, infrastructure design, construction, and operation using AWS and your own infrastructure. Utilizing technical knowledge and experience, you will be in charge of proposing and designing the optimal configuration to solve the customer's issues and requests, building after receiving an order, and operation.
