Recruiter Company	JELLYFISH, INC / 株式会社JELLYFISH
Company Name	Company name is private
Activated / Updated	2024-04-05 / 2024-04-23
Job Type	IT (PC, Web, Unix) - Mobile Application Engineer IT (Other) - Other
Industry	Software Vendor
Location	Asia Japan Tokyo
Job Description	<p>You will be responsible for the development, operation and maintenance of the Android version of our in-house service, moconavi, from design to implementation, testing, and release.</p> <p>■Specific work content</p> <ul style="list-style-type: none"> • New development and improvements (can be involved in proposals including new functions and specification reviews) • Performance tuning and bug fixing • Investigation response to customer inquiries • Technical verification for new services <p>*Depending on your experience, you may be able to participate in adjusting internal requirements and specifications, as well as considering UI/UX.</p> <p>■Development system Development is carried out in teams of 4 to 5 people per team, with a leader at the center. By dividing each task into individual tickets and making my own plans so that the amount of tasks can be completed on the same day, I am able to work with great freedom and without being bound by time constraints. We also have a system in place that allows us to visualize the tasks being performed and their progress, allowing us to quickly find performance and problems.</p> <p>■Services we provide <Safe telework with moconavi, which turns your current location into an office! > moconavi is a telework platform that allows you to securely access various in-house systems from smart devices. It supports companies' flexible working styles with high security and ease of use, allowing you to work comfortably while out and about as if you were in the office.</p> <p>■Assigned department Development Department (26 people in total) You will be assigned to the app development team. The app team is divided into iOS and Android, and has 7 people.</p> <p>■Career image We will respond flexibly to your needs, including tech leads, project managers, engineering managers, lifelong programmer specialists, and product managers. First of all, we will work on your expertise, but we will not limit your role to a specific technology. If it is a voluntary challenge for an individual, you can take on the challenge at your own discretion regardless of your age or experience. You will participate in specifications review based on experience with other technologies and environments and requests from other departments, and will be involved in considering UI and UX. It is also possible! !</p>
	We are an IT company established in 2005 that provides our own services. With a vision of ``a society where everyone can realize ``Your Style" without restrictions," our mission is ``to become a hub for all kinds of communication through technology."
