Position Title	[Tokyo/Development Engineer/Welfare ◎/Over 124 days off per year] Work as a major IT engineer! !
Recruiter Company	NEO CAREER CO., LTD.
Company Name	Company name is private
Activated / Updated	2024-02-29 / 2024-04-17
Job Type	IT (PC, Web, Unix) - Web Application SE IT (Hardware/Network) - Communication Infrastructure (Including ISP and Career) IT (Hardware/Network) - Security System SE
Industry	System Integrator
Location	Asia Japan Tokyo Asia Japan Kanagawa
Job Description	As a system development engineer, you will be responsible for defining requirements, designing, implementing, testing, etc. You will be assigned to the Tokyo metropolitan area (mainly Tokyo and Kanagawa) and will be able to gain experience in a variety of business formats, including business companies, Tiers, and telecommunications carriers. After joining the company, we will have another career interview and select the requirements for assignment, taking into consideration your past career, what you want to do, what you want to achieve in the future, and your work-life balance. Our top priority is to fulfill the engineers' wishes and add value to their careers, rather than the company's circumstances, and our engineering department's dedicated assignment team picks up and assigns projects that are in line with their careers. We are focusing on cutting-edge technologies such as AI and machine learning, with a focus on web system development, and have been selected to work at Sier, telecommunications carriers, etc., mainly at business companies that provide web services. We also offer many environments where you can learn cutting-edge technology and modern development methods, such as AI, machine learning training, React training, agile development training, Scrum Master qualification training, Python basic training, etc.
Company Info	Contract and dispatch services for design, research and development, and experiments in the IT and mechanical/electrical fields In the field of research and development and manufacturing, we provide model-based development (MBD) for the design, development, and experimentation of automobiles, aerospace equipment, home appliances, and robots, and in the IT field, we provide information communication, IT/Internet, and EC. We provide system development, infrastructure design, evaluation verification services, etc. for a wide range of industries, mainly in the following fields. Furthermore, we are actively supporting the use of the latest technologies such as RPA, IoT, UWB, drones, and security, whose demand has been increasing in recent years. ・Average occupancy rate is 98%. Our company has a large number of projects, approximately 22,500 per year, so you can enjoy stable employment. ・80% of our employees are mid-career hires, and we have people from a wide variety of backgrounds, including foreign nationals. We operate an organization that emphasizes diversity. ・There are many ways for engineers to connect with each other, such as interacting through internal SNS that is common to all employees, activating remote communication, and social gatherings for new employees. ・We offer a total of 295 training courses in areas such as technology, business, and language, providing plenty of opportunities for learning. We also have a system that supports up to 100,000 yen for self-study expenses. - There are 224 club activities within the company (from sports to culture to unique club activities), and there is active exchange between group companies, allowing you to meet friends with the same interests.
