Job Type	IT (PC, Web, Unix) - Front-End Engineer IT (PC, Web, Unix) - Back-End Engineer IT (PC, Web, Unix) - Fullstack Engineer
Industry	
Location	Asia Japan Tokyo Asia Japan Osaka
Job Description	◆Current status of backend development The team is working on developing Re:lation by dividing it into teams based on its main features. Re:lation is a "horizontal SaaS" that solves communication issues, so each team adds and improves functions with PMF in mind, depending on the industry attributes of the customer's main functions. ◆Specific work In addition to product development centered on developing new features and functional improvements for Re:lation, you will be responsible for project promotion and team management. <Development related> You will be responsible for carrying out the necessary tasks for product development, such as implementation, test code addition, review, and verification, without being tied to any job function. <Inquiries> Specification confirmation, performance deterioration, defect investigation, etc. <Basic specification study> Technical survey, library selection, component I/F and specification determination <Functional specification study> Collaboration with PdM/designers, etc. <Development process> In many cases, we use agile development using Scrum as a framework. Tasks are assigned based on the priority determined by the product owner. We also conduct regular reviews with our team to create a cycle of improvement. <Others> We will also do what is necessary to improve our services and teams, such as recruitment and technology research. ◆What you expect after joining the company ・Promote the development of new features in collaboration with team leaders ・Quality assurance of other engineers' code (PR review) ・Education and evaluation of junior engineers
	・Because it is a venture company, each person has a big role to play, and because the board members are close to each other, there is an environment where it is easy to reflect one's opinions and a culture where it is easy to make proposals. ・Because it is an in-house product, you can feel that the functions you created directly lead to customer success. ・Since it is a Horizontal SaaS, it is interesting to consider functions for various industries. - Sales are steadily increasing every month, and as the company will continue to grow, there are issues and challenges in each phase, and you will be able to grow as the company grows.
