

## Job Detail

Senior Level

Position Title	★Flex system★ Project manager who promotes DX using global cutting-edge technology.
Company Name	Hitachi Ltd.
Activated / Updated	2024-04-11 / 2024-04-25
Job Type	IT (PC, Web, Unix) - Project Manager
Industry	Manufacturing - Other
Location	Asia Japan Kanagawa Asia Japan Tokyo
Job Description	<p>[Job summary] You will understand GlobalLogic's digital engineering methods and management methods, facilitate them for customers in the Japanese market, and establish GlobalLogic Japan's management methods for digital engineering projects. Additionally, I will be responsible for promoting the establishment of a professional human resources team at GlobalLogic Japan. GlobalLogic Japan has four roles: architect, project manager, strategist, and designer, and project managers are expected to be responsible for multiple projects and coordinate project promotion while working with each role. Masu.</p> <p>[Job details]  <ul style="list-style-type: none"> <li>• Focus on customers' business issues and lead the way in realizing new services and businesses that customers want by applying DX.</li> <li>• Adjust the contract terms and deliverables with the customer, carry out the necessary estimates while controlling the Japan on-site and global bases, and present them to the customer.</li> <li>• As part of global resourcing based on the project scope, we will select the necessary delivery personnel on-site in Japan and at global locations, and build a project structure.</li> <li>• As a member of GlobalLogic Japan, promote DX projects in cooperation with other key roles: lead strategist, lead designer, and architect.</li> </ul> <ul style="list-style-type: none"> <li>- Collaborate with the global development team to understand and control customer expectations and provide results that meet customer needs and issues.</li> <li>- Coordinating the team's work across project activities.</li> <li>- Reporting to leadership and customers to meet expected deadlines, budgets, and scope.</li> <li>• Plan, manage, and promote projects using GlobalLogic Japan's project management methods to ensure that the intended results are achieved.</li> <li>• Involved in establishing a project manager organization at GlobalLogic Japan.</li> </ul> </p> <p>[Charm of the position, rewarding, and career path] As an architect of digital engineering services that combines GlobalLogic's extensive DX experience and capabilities with Hitachi's customer base in the Japanese market and extensive system construction experience, we work together with client companies and partner companies. My job is to materialize digital transformation through collaborative creation. It is very rewarding to be able to not only formulate a concept from an upstream technology perspective, but also to be involved in the realization of the concept based on GlobalLogic's DX track record and Hitachi's highly reliable track record in the Japanese market. During the practical implementation, you will be able to share knowledge and gain work experience with engineers from around the world, including the United States, India, and Ukraine. Since the value that customers seek is diverse, we are able to experience and lead projects that utilize a variety of cutting-edge technologies. I also find it very rewarding to be able to build up GlobalLogic Japan's professional human resources team and to build GlobalLogic Japan's digital engineering methods myself.</p>
