Industry	
Location	Asia Japan Tokyo
Job Description	Develop mobile applications for Android and iOS platforms using Java/Kotlin (Android) and Swift/Objective-C (iOS). Utilize cross-platform frameworks like SwiftUI, Xcode, Flutter, and Jetpack Compose (bonus). Integrate mobile apps with SAP Commerce Cloud services for seamless product catalog, pricing, and checkout processes. Collaborate with designers to implement user interfaces adhering to platform-specific design guidelines. Integrate mobile apps with backend services, APIs, and third-party libraries. Optimize app performance, memory usage, and responsiveness for a smooth user experience. Write unit tests, conduct integration tests, and debug issues for app reliability. Use Git for codebase management and collaboration. Create technical documentation including app architecture and API guidelines. Stay updated with mobile development trends and technologies. Analyze requirements, propose solutions, and troubleshoot issues independently. Perform ongoing maintenance, monitoring, and support for mobile applications. Provide training and support to users and team members on platform usage and best practices.
