Industry	
Location	Asia Japan Tokyo
Job Description	<p>■Job Description</p> <ul style="list-style-type: none">• Replace existing services developed based on jQuery with React• Improve existing functions using React• Develop new functions <p>■Development Policy</p> <p>We want to replace the systems of existing services and make them scalable and fast to respond to changes in business and technology. We aim to containerize and develop microservices.</p> <p>■Development Structure</p> <p>We use an agile/scrum structure.</p> <p>After thoroughly defining requirements, we design, develop, test, and release. The team is divided by function into three teams: the web app team, the mobile app team, and the maintenance and operations team. There is no particular division of development responsibilities, and you can be involved in both existing and new development, and the development planning team assigns development tasks.</p> <p>■Members</p> <p>Currently, the Development Division has 14 engineers, including 4 contracted engineers. The team is made up of 3-4 people, centered around the team leader.</p> <p>■Development environment</p> <ul style="list-style-type: none">• Languages: Go, PHP5, JavaScript• Frameworks: Echo, CakePHP2• Libraries: jQuery, React• Version control: Github• Project management: Backlog• Operation environment: AWS• Server monitoring: New Relic, CloudWatch• Test environment: GithubActions, AWS Amplify• Communication: Slack (within the department), Chatwork (in-house) <p>■PC and devices</p> <ul style="list-style-type: none">• Necessary devices provided• OS can be selected (Windows/Mac)• Model can be discussed <p>■Work environment</p> <ul style="list-style-type: none">• Daily work hours can be selected.• Remote work is used in some teams.• Staggered work hours are used.• Dinner parties are subsidized to stimulate internal communication. <p>■Attractiveness of the job</p> <ul style="list-style-type: none">• Rewarding/highly socially beneficial business <p>We provide a system that connects the dental industry, which has a strong impression of being analog, anywhere via the cloud. You can actually visit dental clinics, reflect customer feedback, and have fun developing while creating industry standards.</p> <ul style="list-style-type: none">• An environment where you can grow and a flexible career path

	<p>Everyone can explore together, improve issues and implement measures repeatedly, and gain experience.</p> <p>We also hold frequent in-house study sessions, and it is an environment where you can pursue a flexible career path according to your inclinations.</p> <ul style="list-style-type: none"> • A comfortable working culture <p>We value personality, and since we often collaborate with other departments, we value harmony. You can contribute to the medical industry in a fair environment where age, gender, nationality, etc. are not important.</p>
Company Info	<p>Our company develops products such as the patient registration app "My Dentist" for patients, using the industry-specific SaaS system "Apotool & Box" that manages patient reservations and treatment at dental clinics as its core.</p> <p>While many parts of the dental industry were still not IT-based, "Apotool & Box" was released in 2014 and has a customer satisfaction rate of 98%. Currently, more than 1,900 dental clinics across the country have adopted it.</p> <p>The cancellation rate over the past three years has been less than 1%, and it is a high-quality in-house system that has satisfied a large number of dental clinics.</p> <p>It can also manage intraoral photos and X-ray data, and you can share the captured data chronologically with patients who have installed the patient registration app "My Dentist". Using this function, patients can also use it to get a second opinion, and we are developing a service that contributes to society.</p> <p>As oral health awareness in Japan is increasing, we are looking for a front-end engineer to promote digital transformation at dental clinics!</p>
Qualifications	<p>*Someone with JLPT Level 2 Japanese language ability or higher(MUST be able to adequately communicate in the workplace and understand work responsibilities in Japanese)</p> <p>*This position requires the person to currently be living in Japan.</p> <p>Required skills</p> <ul style="list-style-type: none"> • Experience in front-end development of web applications • Over 1 year of development experience in JavaScript • Over 1 year of development experience in React <p>Welcome skills</p> <ul style="list-style-type: none"> • Over 3 years of experience in front-end development of web applications • Development experience in jQuery • Familiarity with AWS <p>Desired profile</p> <ul style="list-style-type: none"> • Those interested in the medical and IT fields • Those who have systematically experienced the development process • Those who want to work on user-first development • Those who enjoy learning new technologies • Those who want to take on the challenge of development in the startup phase
