Job Detail

Position Title	[Osaka: Remote] Application Engineer (Nearshore Development) Prime project x In-house work
Recruiter Company	WORKPORT, inc.
Company Name	Company name is private
Activated / Updated	2024-05-04 / 2024-05-15
Job Type	IT (PC, Web, Unix) - Business Application SE
Industry	
Location	Asia Japan Osaka
Job Description	[Job Summary] As an engineer for the company, you will be involved in projects contracted in Fukuoka as a nearshore development member from Osaka. [Job Details] You will be responsible for the development and testing phase of projects contracted by the company group, which will be extracted as nearshore. The IT technology used in the projects is advanced and cutting-edge, so you will be able to improve your IT skills as an engineer. You will also be responsible for all processes (requirements definition, design, development, and testing) for system development projects that the company accepts independently, together with members from other locations. ■Work Environment - Generally, we do not have on-site work at client sites, and we develop in-house. - Since we often develop from scratch, you will often learn by participating in actual projects. - As an independent SIer, we are not influenced by the intentions of affiliated companies and can act with the customer's perspective first.
Company Info	[Recommended for the following people] - Those who want to work on projects in-house rather than being stationed at a client's office - Those who want to directly interact with customers, directly reflect their requests in the system, and propose improvements that are in line with the customer's true objectives - Those who want to experience a wide range of phases throughout the project, rather than just part of it - Those who want to see the system they designed and developed through to operation after release
Working Hours	9:00-18:00
Qualifications	[Required] Those who meet all of the following conditions ・Experience with Java or C# (3 years or more) ・Experience with SQL (3 years or more) [Preferred] ・Experience as a project leader or member in the design/development, operation/maintenance phase ・Experience building infrastructure
