Job Description	<p>【About the Company】 The company develops and operates cloud services for the human resources industry, both domestically and internationally. It supports the entire workflow of the list from managing a company's hiring needs, entering job seekers, setting up and managing automated interviews, matching, making decisions, and updating the list.</p> <ul style="list-style-type: none"> • The number of companies that have adopted the system ranges from some listed companies to small and medium-sized customers, with more than 2,100 companies, 10,000 IDs of paying users in 11 countries around the world, and the system is provided on a subscription model. • The company has received the "Leader" award in the recruitment and staffing system category of the "ITreview Grid Award 2023 Winter" for 13 consecutive terms for its high level of satisfaction and recognition from users. • AI-based scout assist service also launched, speeding up service development. <p>【Responsibilities】 The company is looking for a person who can drive business growth of cloud services from a "defensive" perspective. You will be responsible for planning IT governance strategies and security control activities to ensure service continuity during the operation phase.</p> <p>【Specifically】 1. Planning, execution, and operation of security strategies Based on the characteristics of the business, you will be responsible for extracting and evaluating risk factors that need to be taken care of from short-, medium-, and long-term perspectives, and engaging in a series of tasks from planning action plans to implementation and operation of measures. In addition to applying the planned strategies, you will also be responsible for promoting measures to strengthen IT governance within the company.</p> 2. Security management and control operations You will lead the overall security management and control operations, including the study and implementation of policies to reduce and avoid security risks, as well as periodic operational and business improvements for in-house developed products.
