Recruiter Company	G Talent/Bizmates, Inc.
Company Name	Company name is private
Activated / Updated	2024-04-23 / 2024-04-24
Job Type	Creative(Internet Related) - UI/UX Designer
Industry	Software (Consignment Development)
Location	Asia Japan Tokyo
Job Description	■Recruitment Background The company is developing and deploying multiple services with the aim of building a "research empowerment platform. In addition to the growth of existing services, the "power of design" is required in various scenes such as the launch of new businesses and the planning and development of new services, and product UI/UX designers are also expected to play an active role in various areas. The company is looking for people who share the company's purpose and are willing to work together. ■Responsibilities From a design perspective, you will design experiences that are valuable to customers and users, and contribute to solving user issues and product growth. - Specifically *You will be responsible for the following depending on your strengths and orientation ・General UI/UX design of the company's products/services ・Prototyping of information design and visual design for new functions and services ・Planning and production of design guides ・Involvement in defining requirements and requests for improvement proposals and measures for functions ・Communication design with users ・Designing strategies to achieve goals ・Collaboration and communication with other departments ・Collaboration and communication with other departments etc. - Tool used ・Figma ・Adobe CC（Photoshop, Illustrator, etc.） ・Jira ・Confluence ・Slack ・Google Workspace ■Attractiveness ・Because of the small number of designers now, each designer has a great deal of discretion, and you can feel that you are creating value with your own hands in this rewarding environment. ・In addition to UI/UX design of existing products and services, you can also be involved in upstream processes and adjacent areas, such as UX research and prototype verification for new services. ・You can also get involved in Employee Experience (employee experience) and organizational design, such as setting up a design team and designing corporate culture.
	■About the company The company is a start-up company that develops various in-house services in the research x technology field "LabTech". Its mission is to "bring the power of research to the power of humanity" and to "solve problems in the field of research" to become the power of humanity. They are trying to create a society where researchers can play a more active role by solving the problems in the research field, as there are still many old-fashioned problems in the research departments of universities and companies.

Company Info	■What is LabTech? LabTech" is defined as the field in which LabBase develops its business by combining the words "Lab (research)" and "Technology". This field is still untouched, and science and business are still separated. The company's role is to create a "research empowerment platform" that connects the two. ■About the main products This is a recruiting service that connects engineers and science students who are working hard on research with companies. It has various options such as scouting, events, media, market research, etc. We will customize our proposals to meet the challenges of clients.
Working Hours	10:00~19:00
Qualifications	【Required】 - 3+ years of experience as a UI/UX designer for BtoB and BtoC products/services, or equivalent experience - Working experience in UI design using prototyping tools such as Figma *Please submit the URL of your portfolio when applying. *Please note that if you do not have a portfolio, you may be dropped at that point. 【Preferred】 - Experience as a designer for a business company's own services - Experience in mobile app design - Experience in user research - Experience prototyping new features and services - Experience in directing design - Experience building and operating design systems - Experience in designing and implementing accessibility-conscious design - Copywriting skills - Experience working in teams with PdMs and engineers ■Ideal Applicants ・Empathy with the company's Purpose and a desire to solve problems in the research area through the power of design ・Dedication to goals and outputs, and a desire to achieve them. ・Able to positively take on difficult challenges without narrowing one's field of activity ・Have honesty and humility, and be able to communicate with others in a respectful manner ・Contribute to the growth of the organization and the team as well as their own growth
