Position Title	Infrastructure engineer (server engineer)
Company Name	Randstad K.K IT Solution Services Division
Activated / Updated	2024-05-17 / 2024-05-17
Job Type	IT (Hardware/Network) - Server Architect and Developer IT (Hardware/Network) - Network Engineer IT (Hardware/Network) - Cloud Engineer
Industry	Internet Services/ISP (Internet Service Provider)
Location	Asia Japan Tokyo Asia Japan Kanagawa Asia Japan Osaka
Job Description	<p>We plan to increase the number of members for contract projects that take on the entire development process. There are a wide range of stages from design, construction, implementation, and operation, and you can be the first to come into contact with new technologies in a stable environment. If you want to steadily build your career as an engineer, please choose us.</p> <p>[Job Overview] Not only can you start with a project that matches your previous experience, but you will also be involved in projects that handle a wide range of layers such as servers, networks, and clouds, and handle everything from requirements definition to design, construction, and even operation.</p> <p>[Examples of assigned work content] ◆Infrastructure system planning - requirements definition ◆Platform environment construction ◆Security environment construction ◆Network environment construction ◆Introduction and construction of cloud services ◆Virtualization solutions ◆Pre-sales for the above projects ...etc.</p>
Company Info	<p><<Our Features>> 【About our team structure】 Projects to be assigned are decided after careful consideration of individual preferences and skills.</p> <p>There are about 3 to 10 team members per project. The duration varies from 3 months to more than 6 months. In addition, the sales representative who communicates with the customer is also a former engineer, so they share a common understanding of the work content and development environment with the engineering team. If you have any concerns, you can consult with them immediately and they will understand quickly.</p> <p>【About the appeal】 ◆You can improve your skills in a stable environment. Our company boasts the "world's largest" scale, providing comprehensive human resources services including engineering not only in Japan but also in 39 countries and regions and more than 4,400 locations. Naturally, we have a wide variety of infrastructure projects, and we have a strong relationship of trust with our customers that has been cultivated over our 60-year history, which is why we can prepare tasks and environments that meet the engineers' own needs. Since the sales representative is also a former engineer, when accepting a new project, we consult with the engineer and assign tasks while communicating with him/her.</p> <p>◆It is a personnel system that allows us to fairly evaluate results. We set goals and future career paths every six months together with the head of the business division. We set detailed job grades to accommodate both "generalists" and "specialists," and we have designed it so that the better your performance, the higher your evaluation. Therefore, you can steadily build your career as an "engineer" without moving into management. There is no mandatory retirement age for positions, so your salary will not suddenly decrease and you can continue to increase your income according to the evaluation system.</p>
Working Hours	9:00-18:00 *Working hours may vary depending on the client's working hours.
