Activated / Updated	2024-05-08 / 2024-05-23
Job Type	IT (PC, Web, Unix) - Mobile Application Engineer IT (Other) - OS Development
Industry	Software Vendor
Location	Asia Japan Tokyo
Job Description	<p>You will be in charge of developing (design, implementation, testing) the iOS app for our in-house service "moconavi". As the number of users and inquiries increases, we will be adding staff to add features to the moconavi app and carry out its operation.</p> <p>[Services] <Work safely from home with moconavi, wherever you are! > moconavi is a telework platform for secure access to various internal systems from smart devices. With high security and operability that allows you to work comfortably on the go as if you were in the office, we support flexible work styles for companies.</p> <p>[Specific work content] <ul style="list-style-type: none"> • New development and improvement (you can be involved from proposals and specification considerations, including new features) • Performance tuning and bug response • Research and response to customer inquiries • Technical verification for new services * Depending on your experience, you can also participate in internal requirements and specification adjustments and UI/UX considerations.</p> <p>[Development structure] Each team is made up of 4 to 5 people, and the leader is at the center of the team. Each task is broken down into tickets, and by planning for yourself so that the amount of tasks to be completed on that day, you can work with a high degree of freedom and without being bound by time. We also have a system in place that makes tasks and progress visible, so that performance and problems can be found as quickly as possible.</p> <p>*You may also be involved in adjusting specifications with other departments within the company. *Depending on the situation after joining the company, you may be asked to develop on both iOS and Android OS.</p> <p>[Career image] We will flexibly respond to your wishes, such as tech lead, project manager, engineering manager, lifelong programmer specialist, product manager, etc.</p> <p>[Attractiveness] First of all, you will be asked to work with expertise, but your role will not be limited to a specific technology. If it is an individual's voluntary challenge, you can take on it at your discretion regardless of age or experience, and you can experience other technologies and environments, participate in specification discussions such as requests from other departments, and be involved in UI and UX considerations.</p>
Company Info	<p>Founded in 2005, this is an IT company that offers its own services. With a vision of "a society where everyone can realize 'Your Style' without restrictions," the company's mission is to "become a hub for all communication through technology."</p> <p>[Our own services] <ul style="list-style-type: none"> • "moconavi" A cloud-based remote access service that enables smart teleworking and BYOD.</p>

	<ul style="list-style-type: none"> • "moconavi RDS" <p>A remote desktop app that uses screen transfer technology to access business applications and software from outside the company, providing the same work environment as usual.</p> <ul style="list-style-type: none"> • "moconavi 050" <p>A phone service that allows you to add a 050 business number to your personal cell phone, making it ideal for BYOD.</p>
Working Hours	<p>6:00-22:00 (7 hours 30 minutes working, 60 minutes break)</p> <p>*Full flextime system (no core time)</p>
