仕事内容	<p>◆Recruitment background The server side of TRILL is being replaced by Node.js (Express) to Ruby on Rails, and the infrastructure is being replaced by GCP to AWS. After the replacement is complete, we will update our media service and aim to create products that can generate even greater value with a medium-to long-term perspective. We are looking for a server side engineer who will be responsible for the future development of TRILL!</p> <p>About TRILL: https://trilltrill.jp/</p> <p>◆Job description</p> <ul style="list-style-type: none"> • API server development for mobile apps (Ruby on Rails) • Server development for web services (Ruby on Rails) • Front-end and API server development for the management site (React, Ruby on Rails) <p>◆The appeal of this job</p> <ul style="list-style-type: none"> • You will be involved in large-scale service with more than 45 million monthly users • You will be able to perform development tasks with discretion since we are a small team • You can have experience not only in server-side, but also in front end and infrastructure (AWS) • Since there is a wide range of technical coverage, you can actively challenge new technologies and test them in production • You will be able to introduce new libraries, improve the architecture, and implement automation • You can get involved in planning measures and data analysis and can work on solving user issues on your own
企業について(社風など)	<p>dely, Inc. is a company that provides information related to "food" such as recipe videos and services aimed at solving problems in "food and living."</p> <p>In the main recipe video business "kurashiru", we aim to be a "service that is close to people's lives" and send out content such as recipe content. In April 2020, we won the No. 1 position in Japan in terms of the number of users (both web and apps), the number of app DLs, the total number of SNS followers, and the number of recipe videos.</p> <p>"TRILL," a media for adult women, has won the number one monthly user number in Japan, and publishes various contents such as fashion, beauty, romance, fortune-telling, and lifestyle. By adding "TRILL" to the service, the total number of monthly users including "Kurashiru" has exceeded 40 million.</p> <p>As of October 2020, the number of employees is about 140, and the average age is 29 years old. Members have various previous jobs such as engineers, creators, marketers, and cooks. What I am aware of in internal communication is to create a flat and open environment. The management has professed that they will "give up their seats to those who are more capable than themselves," giving everyone an equal chance.</p> <p>◆ Culture It is said that "one-third of life is work", but dely is characterized by a high awareness of time. In order to minimize the number and time of meetings, we thoroughly implement "30 minutes in principle". At the same time, in order to effectively utilize the limited time and strengthen the bonds between members, we have set up many events that promote communication, such as club activities and watching the Hakone Ekiden by volunteers.</p>
勤務時間	<p>Work Hours</p> <ul style="list-style-type: none"> • Flextime: Core time 10: 00-16: 00, Flexible time: 5: 00-10: 00, 16: 00-22: 00 • Scheduled working hours: 8 hours a day (average)
応募条件	<p>MUST</p> <ul style="list-style-type: none"> • At least 3 years of work experience in server-side development of web applications <p>Preferred</p> <ul style="list-style-type: none"> • Working experience in Ruby on Rails development • Experience in server-side development for media services • Experience in high-traffic web application development

	<ul style="list-style-type: none">・ Working experience with JS frameworks such as Vue.js and React・ Experience in building infrastructure using cloud such as AWS
